

CSR

SSR

SSG

ISR

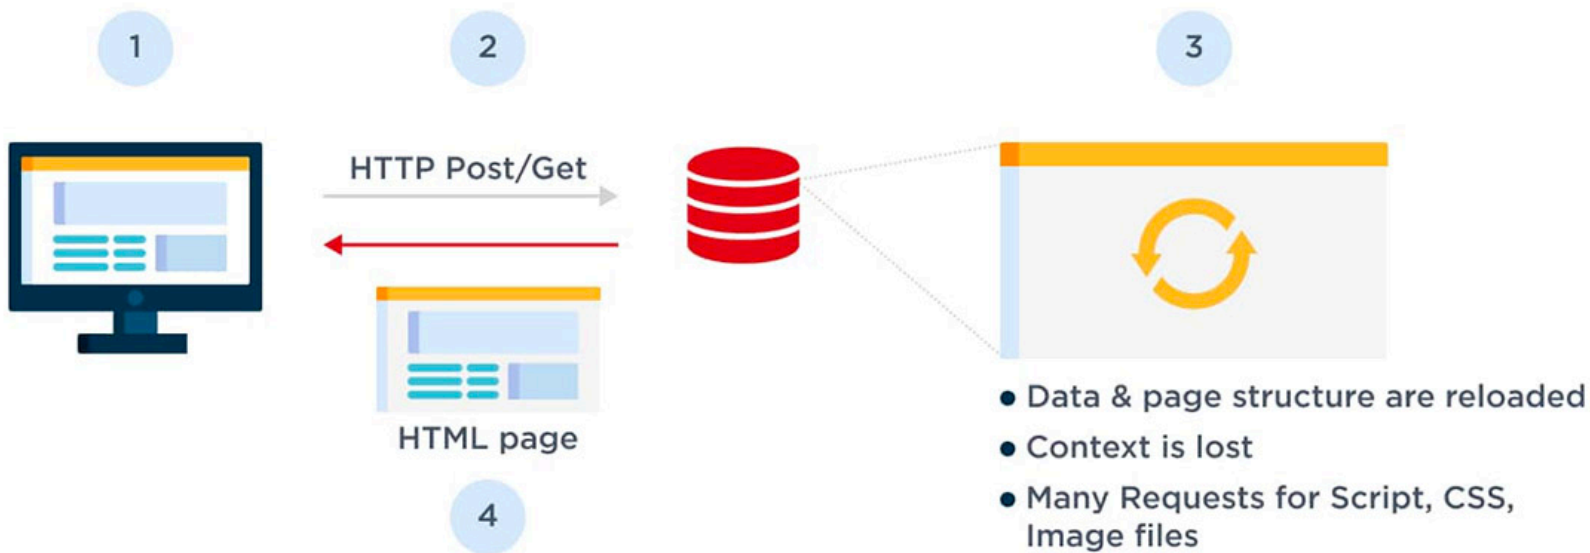

Renderizado HTML

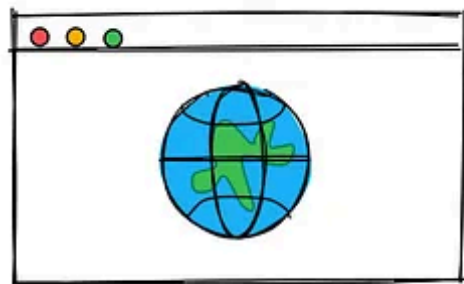

Traditional Web Apps ○ Multiple Page Applications

Lo que hace nunjucks, php, django, etc

MPA Design

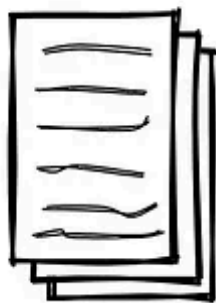

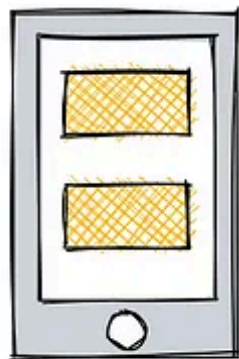

client (browser)

`https://mywebsite.com/mypage`

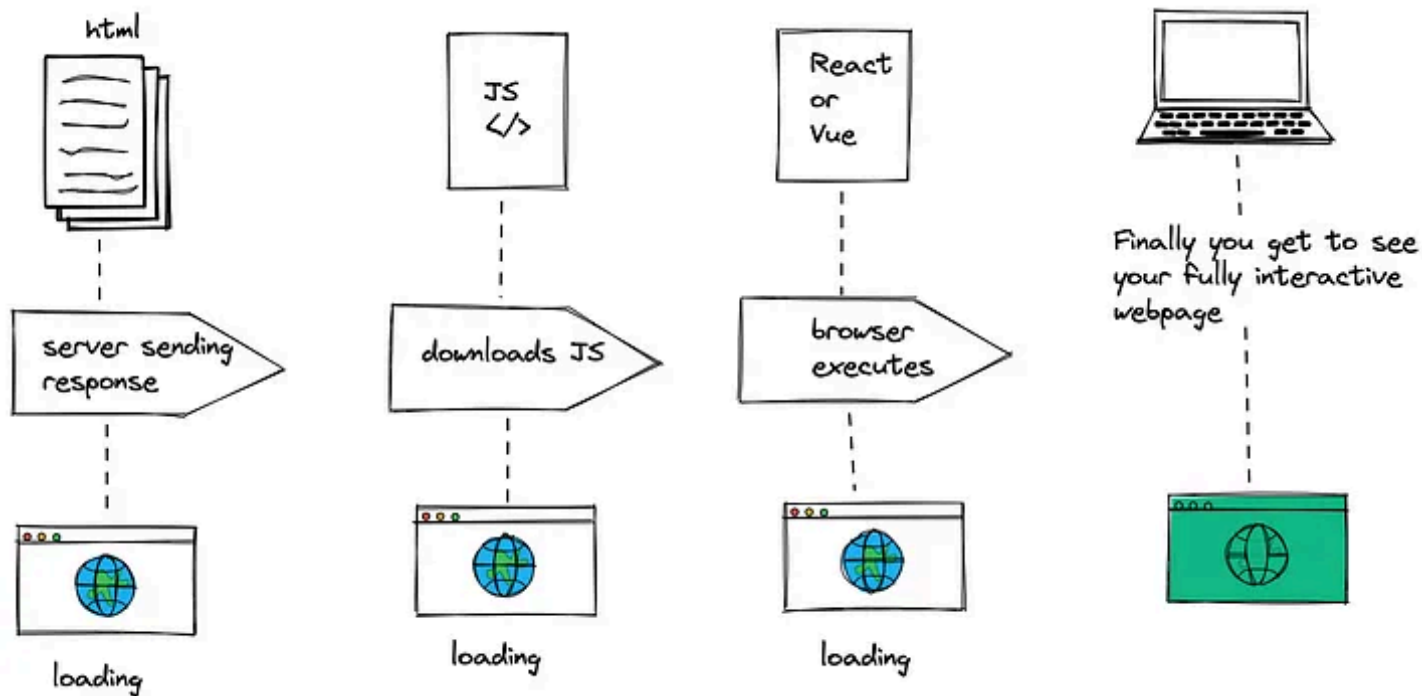

server

html page

Client Side Rendering o Single Page Applications

Lo que hace react, angular, vue, etc

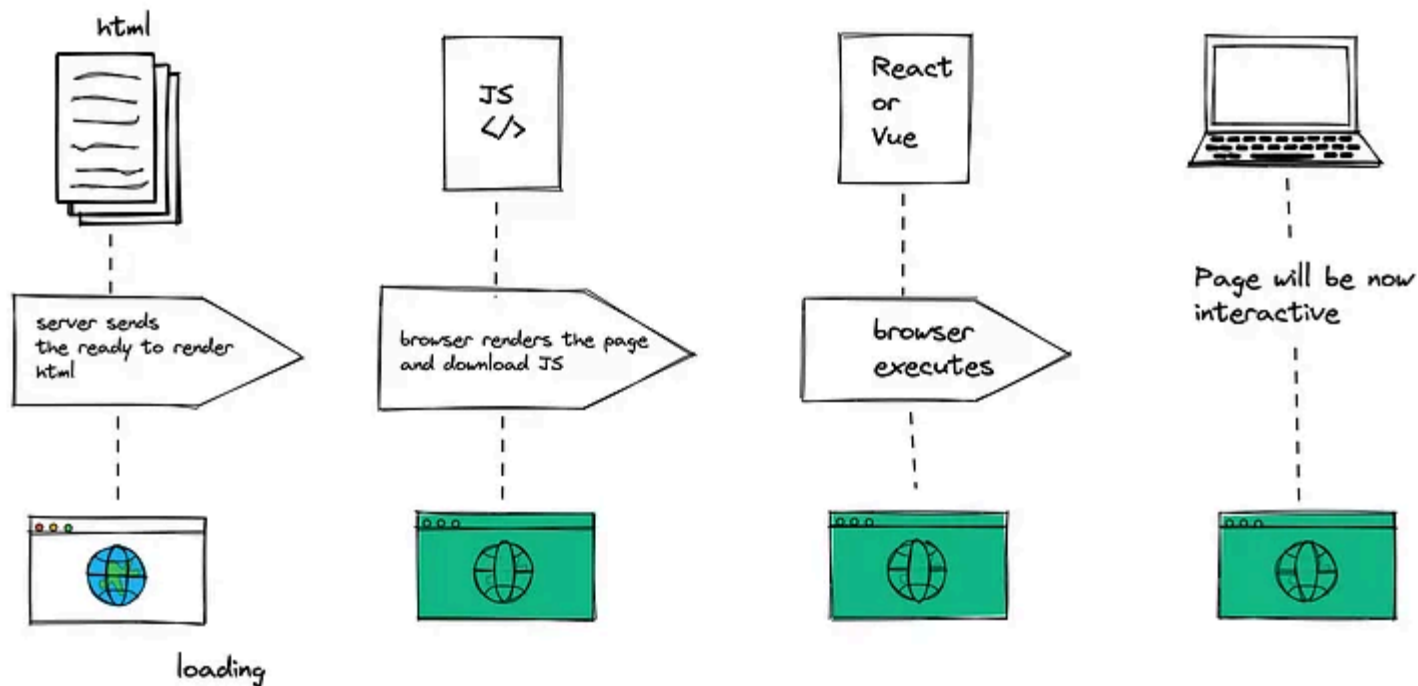

Inconvenientes del Client Side Rendering

- Carga una página en blanco: sin SEO
- Más complejo
- Menos escalable
- Carga lenta

The web page rendering dilemma

Server Side Rendering

React en el servidor

Más posibilidades: **S**erver **S**ide **G**eneration

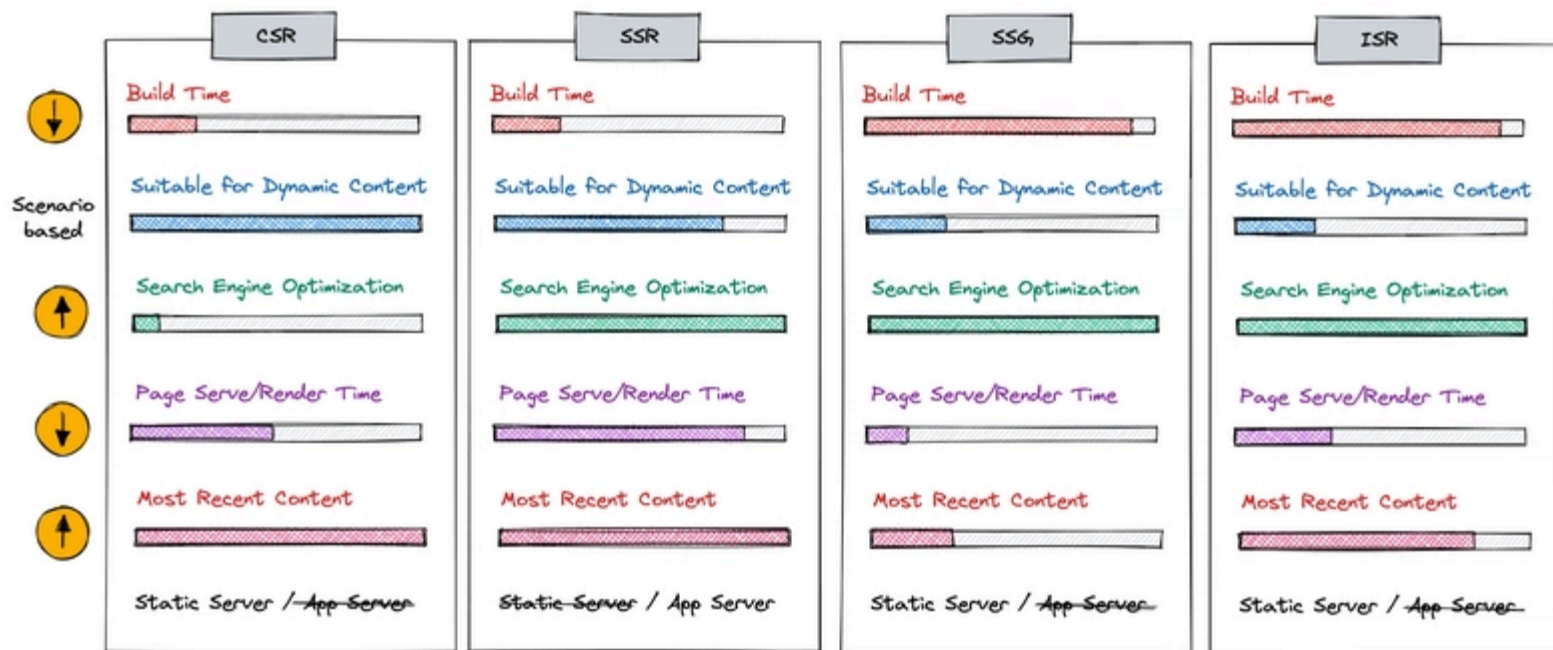

SSG vs SSR explained in 10 minutes

Recapitulando

Visual Explanation and Comparison of CSR, SSR, SSG and ISR

Static Server is good
due to less resources
