que sigan los principios de UX

UI vs UX: ¿Cuál es la diferencia?

Algunas aclaraciones:

Diferencias: **Responsive** vs **Adaptive** vs **Mobile-first**

Un sitio **Adaptable**

Responsive

Single design that reflows across displays

Adaptive

Creates templates that are optimum and unique for each device class

Mobile-First

Responsive / Adaptive
Web Design

Mobile First Strategy

Diseño responsive: unidades relativas

CSS Units Cheat Sheet

px

Absolute pixel value

%

A percentage of the parent element.
100% is the width of the parent element

em

Relative to the font size of the element

vh

Relative to 1% of the viewport's height

rem

Relative to the font size of
the root element

vw

Relative to 1% of the viewport's width

Diseño responsive: unidades relativas

What is the Difference Between EM and REM and Which CSS Unit to Use

flexbox basics

`display: flex;`

set on a parent element
to lay out its children
with a flexbox layout.

by default, it sets

`flex-direction: row;`

TRY
ME!

`flex-direction: row;`

by default, children are
laid out in a single row.
the other option is
`flex-direction: column`

`flex-wrap: wrap;`

will wrap instead of shrinking
everything to fit on one line

`justify-content: center;`

horizontally center
(or vertically if you've set
`flex-direction: column`)

`align-items: center;`

vertically center (or
horizontally if you've set
`flex-direction: column`)

you can nest flexboxes

Diseño responsive: **flexbox** ayuda a los

Principios del diseño UI:

- Alineación efectiva
- Jerarquía visual
- Consistencia
- Adaptación y responsividad
- Simplicidad y claridad
